

ESC | STACKVISION NEW USER MINI (1-DAY) TRAINING

Course Description

Workshop 4 - Room 4

Wednesday March 7, 2018 (7:30 to 4 pm)

Danny Hintzman, ESC dhintzman@envirosys.com

Email: jbrooks@envirosys.com with questions - Jennifer Brooks | Marketing Specialist

Phone: 512-250-7837, (512) 250-7952

This workshop will provide participants with a greater understanding of ESC's StackVision software. Topics will include: Using CEMSCape, CalGas Management, Using StackVision Reports & Creating Linked Reports, Using Filters and Summaries, Data Controller Essentials and an Introduction to StackStudio.

1. Using CEMSCape

An introduction to the StackVision CEMSCape feature. Getting to know the overall purpose of the CEMSCape components and how to use CEMSCape to better understand your configuration and how to use CEMSCape for troubleshooting.

2. CalGas Management (The latest version should be out by then)

Gain an understanding of the CalGas Management feature to maintain calibration reference values and calibration gas cylinder inventories.

3. Using SV Reports & Creating Linked Reports

Participants will understand how to locate and generate standard StackVision reports, the benefits of using System Design Reports and creating linked reports to streamline the reporting process.

4. Using filters and summaries

In this session, using filters in and summaries in StackVision feature areas to create time saving personalized views in StackVision.

5. Data Controller Essentials

Participants will identify features of the ESC 8864 Data Controller and become familiar with accessing and navigating the data controller remotely.

6. Introduction to StackStudio (1/2 day after lunch)

An introduction and overview of the ESC StackStudio configuration tool.
